

Ophthalmic Hospital Reports

AND JOURNAL OF THE

ROYAL LONDON OPHTHALMIC HOSPITAL.

1873.

VOLUME SEVEN.—PRICE TWELVE SHILLINGS.

LONDON :

TO BE HAD OF

MR. CHURCHILL, 11, NEW BURLINGTON ST.

NEW YORK, MR. BAILLIERE, 449, BROADWAY.

HARRISON AND SONS,
PRINTERS IN ORDINARY TO HER MAJESTY,
ST. MARTIN'S LANE.

CONTENTS

OF

THE SEVENTH VOLUME.

PART I.

ORIGINAL CONTRIBUTIONS.

	PAGE
1. C. J. WORKMAN, Cases of Temporary Anchyloblepharon.....	1
2. JONATHAN HUTCHINSON, On Lead-Poisoning as a Cause of Optic Neuritis	6
3. GEORGE LAWSON, Punctured Wound of the Sclerotic, with Escape of Vitreous, treated by closing the wound with a Suture	14
4. D. ARGYLL ROBERTSON, Case of Sympathetic Retinitis Pigmentosa	16
5. HERMANN PAGENSTECHER, The Treatment of Sämisch's "Ulcus Corneæ Serpens"	21
6. HERMANN PAGENSTECHER, Atrophy of the Optic Nerve after Erysipelas of the Face (two cases)	32
7. JONATHAN HUTCHINSON, A Case of Amaurosis after Erysipelas....	35
8. JONATHAN HUTCHINSON, Miscellaneous Cases and Observations....	37
9. In Memoriam.—Albert Von Graefe.....	48

PERISCOPE.

1. A Contribution to the Pathology of the Vitreous Humour, or on the Pathology of the Vitreous Body—2. Graefe's latest contributions to the Pathology and Treatment of Glaucoma.....	57
--	----

PART II.

ORIGINAL CONTRIBUTIONS.

1. HERMANN PAGENSTECHER, Pathological and Anatomical Researches on the Inflammatory Changes occurring in the Intraocular Terminations of the Optic Nerves as a consequence of Cerebral Disease	125
2. FREDERICK MASON, Long-persistent Diphtheritic Conjunctivitis following Measles.—Loss of both Eyes.—Scarlet Fever occurring during the course of Disease	164

	PAGE
3. JONATHAN HUTCHINSON, Statistical Details of Four Years' Experience in respect of the form of Amaurosis supposed to be due to Tobacco	169
4. CHRISTOPHER J. S. JEAFFRESON, Cases selected from Ophthalmic Practice	186
5. EDWARD NETTLESHIP, Curator's Pathological Report	193
6. EDWARD NETTLESHIP, Note on a New Method of Preserving and Mounting Eyes for examination by the naked eye or by low powers of the Microscope	225

PERISCOPE.

1. Choroido-Retinitis Complicating Strabismus—2. The Action of Atropine on Intra-ocular Tension—3 and 4. New Ophthalmoscopes—5. Glioma of the Retina—6. Catarrh of Lachrymal Sac; Stilling's Operation—7. Advisability of Operating in Cancer of Retina—8. Foreign Body within the Eye for 43 years—9. Palpebral Granulations—10. Anæsthesia of the Retina—11. Primary Caries of Orbit—12. Means of proving Amblyopia of one Eye only—13. Cyst of Excretory Duct of Lachrymal Gland—14. Ascending Glioma of Retina—15. Epithelial Tumour of Eyeball—16. Dermoid Tumour of Eyeball—17. Application of a Leech to the Eye; Chronic Consecutive Inflammation; Sympathetic Ophthalmitis of the other Eye—18. Foreign Body in Iris—19. Traumatic Division of Internal Rectus—20. The co-existence of Aneurismal Changes in Retina, with Aneurisms of small Arteries of the Encephalon—21. Asthenopia from Spasm of Muscles of Accommodation—22. The Ophthalmoscope in Epilepsy—23. Tumour of Brain—24. Retinitis Pigmentosa in connection with Inherited Syphilis—25. Dermoid Tumour of Cornea—26. An after danger of Peripheral Prolapse of Iris—27. Retinitis Pigmentosa—28. Albuminuric Retinitis—29. Melanotic Cancer of Cornea—30. Regeneration of Epithelium of Cornea—31. Idiopathic Wasting of Eyeball—32. Tannate of Lead in Ophthalmia—33. Defect of Sight in Leucocythemia—34. Operation for Entropion, &c., &c.	229
---	-----

PART III.

ORIGINAL CONTRIBUTIONS.

1. GEORGE LAWSON, A Cancerous Tumour originating in an Eye which had been long lost from some Inflammatory Affection	277
2. JONATHAN HUTCHINSON, A Report on the Forms of Eye-disease which occur in connexion with Rheumatism and Gout.	287
3. GEORGE COWELL, A New Strabismus Hook. New Test-types	333

4. GEORGE COWELL, Inflammation of Uveal Tract occurring in a Father and Three Sons—Right Eye primarily Affected in all—Left Eye subsequently attacked in Two—The Lens Cataractous in Four Eyes—Probably Syphilitic—Mother the subject of Congenital Cataract	335
5. EDWARD NETTLESHIP, On Œdema, or Cystic Disease, of the Retina	343
6. EDWARD NETTLESHIP, Curator's Report	352

PERISCOPE.

1. Formation of Bone in the Eye—2. Phlebitic Ophthalmitis—3. An Ophthalmoscope to be used by Two Observers—4. A Handy Prismatic Combination—5. Treatment of Wounds of the Eye by Suture—6. Exostosis of the Orbit; Removal; Recovery—7. The Mode of Production of Exophthalmic Goitre—8. The Regeneration of the Crystalline Lens in certain Mammals—9. Hospital Gangrene after Removal of Eyeball, &c.—10. Circumscribed Choroiditis—11. Extraction of Cataract without opening the Capsule of the Lens—12. Extraction of Cataract—13. The Condition of Vision in very young Infants—14. Emphysema of the Eyelids, &c.—15. The Light Streak seen in the Centre of the Retinal Vessels with the Ophthalmoscope—16. Injuries of the Eyeball, &c.—17. Iridectomy without Division of the Sphincter Pupillæ—18. Paralysis of Accommodation—19. Conical Cornea—20. Sympathetic Ophthalmia with Neuro-Retinitis—21. Pterygium Superius—22. Glioma of the Retina—23. Tumours of the Retina—24. Statistical Report of Dr. Wecker's Clinique—25. The Halo round the Macula Lutea—26. Operations for separation of Posterior Synechiæ—27. General Syphilitic Inflammation of the Eye—28. Case of Partial Temporary Blindness—29. Gunshot Wound of the Brain, followed by Fungus Cerebri and Recovery with Hemiopia—30. An Additional Method for the Determination of Astigmatism, Astigmatism as an active cause of Myopia—31. Remarks on Cataract—32. An Apparatus for Testing the Perception of Colour—33. Detachment of the Retina, with Laceration, at the Macula Lutea—34. The Use of Atropia in the Treatment of Incipient Strabismus, &c., &c.	394
---	-----

PART IV.

ORIGINAL CONTRIBUTIONS.

1. JONATHAN HUTCHINSON, Suggestions for Clinical Work in Ophthalmology	431
2. W. SPENCER WATSON, On a New Operation for Distichiasis, with a Successful Case	440

	PAGE
3. HENRY POWER, A Case of Sympathetic Ophthalmia in which Recovery resulted	443
4. J. F. STREATFEILD, Cases of Congenital Peculiarities in the Eyelids, &c.	451
5. JONATHAN HUTCHINSON, A Report on the Forms of Eye-disease which occur in connexion with Rheumatism and Gout	455
6. JONATHAN HUTCHINSON, Cases illustrating the Ophthalmoscopic Appearances of Syphilitic Choroiditis	494
7. CASES SELECTED FROM HOSPITAL PRACTICE. Streatfeild, Hutchinson, Tay, &c.	498
8. J. HUGHLINGS JACKSON, Observations on Defects of Sight in Diseases of the Nervous System	513
9. EDWARD NETTLESHIP, Curator's Pathological Report	528
10. W. NEWMAN, Destructive Ulceration of Cornea followed the removal of a malignant Wart on one Eyelid	638

PERISCOPE.

1. The Treatment of Squint at the Dutch Ophthalmic Hospital—2. Visible Pulsation of the Retinal Vessels—3. The Posterior Lymph-passages of the Eye—4. Pigmentary Deposits in the Cornea—5. Metastatic Irido-choroiditis—6. Glaucoma—7. Neuro-retinitis with Cerebral Tumour—8. Contributions to Ophthalmotonometry—9. The Ophthalmoscopic Image of the large Retinal Vessels—10. Optic Neuritis from Lead Poisoning—11. Engorged Optic Disc in consequence of Solitary Tubercle in the Cerebellum—12. Anatomical researches on Typical Retinitis Pigmentosa—13. Effects of Division of the Optic Nerve—14. A Case of Formation of Pigment in the Retina in consequence of Retinal Hæmorrhages—15. Case of Congenital Retinitis Pigmentosa—16. General Chronic Herpes Zoster; Atrophy of the Optic Nerves; Furious Delirium—17. Paralysis of the Trigemini, followed by Sloughing of the Cornea—18. Anomalous Circulation in the Eye—19. Strychnia as a Retinal and Optic Nerve stimulus, &c., &c.	639
